computing related

Here are some links to things that I wrote and/or found to the “computing” theme and thought they may be useful .

- Internet in general
  - a table of colors containing “safe” colors in the web
- to Dokuwiki, the software I used to realize this homepage
  - Cites from different texts for fortune
  - Information how to prepare pages from Dokuwiki for download in PDF format (original page on plugin:pdfdownload, a better version is plugin:pdfex
  - exttab1 test page for “extended table syntax” analogue to MediaWiki, dito in english, Source: plugin:exttab1
  - Spielseite for exttab1 plugin
  - a misbuilt renderer plugin for DokuWiki
  - a non-working syntax plugin to show the daily cartoon from userfriendly org
- to Linux, especially openSUSE
  - how does rug work with apt sources?
  - Repository search for OpenSUSE 10.x in PHP and in Perl; slightly modified for OpenSUSE 11.0, also in Perl
  - get Repository keys for OpenSUSE zypp/packet manager smart
  - self-written start up script for SAP software running on SLES 10 (replacement for package sapinit)
- to Linux, without dedication to a certain distribution
  - eliminate duplicates either delete them or changing them into a link
  - the great software rssh has some installation flaws. On rssh as rpm, you can read how to fix them to be able to install rssh as rpm

And a page where you can see how long it takes for my office computer to boot up: Systemd boots my office computer
